

STATEMENT OF WORK
Nutrient Management (590)
Pennsylvania

These deliverables apply to this individual practice. For other planned practice deliverables refer to those specific Statements of Work.

DESIGN

Deliverables:

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
 - a. Practice purpose(s) as identified in the conservation plan.
 - b. Client is informed that state, local and other permits may need to be obtained.
 - c. Practice standard criteria-related computations and analyses to develop plans and specifications including but not limited to:
 - i. Results of applicable soil, water, manure, organic by-product and plant tissue sampling, analyses, and tests provided by the client.
 - ii. Realistic yield goals for the crop(s) to receive nutrient applications.
 - iii. Planned nutrient and soil amendment application rates, methods, and timing of application in balance with the nutrient budget.
 - iv. Use of appropriate risk assessment tools for phosphorus transport when manure or other organic materials are a source of nutrients.
 - v. Other requirements applicable to manure or organic materials, non-point source pollution, soil condition, and air quality.
2. Written plans and specifications shall be provided to the client that adequately describes the requirements to implement the practice and obtain necessary permits. Plans & specifications include:
 - a. Maps (site map or aerial photography and soil survey maps) that identify areas on which nutrients will be applied.
 - b. Location of designated sensitive areas or resources and the associated nutrient application restrictions.
 - c. Listing of quantity and source of all nutrients.
 - d. A complete nutrient budget for nitrogen, phosphorus, and potassium for the crop rotation or sequence.
 - e. Guidance for implementation, operation, maintenance and record keeping.
 - f. Other requirements listed in the conservation practice standard Nutrient Management (Code 590).
3. Certification that the design meets practice standard criteria.
4. Design modifications during installation as required.

INSTALLATION

Deliverables

1. Pre-implementation conference with client to review the plan
2. Verification that client has obtained required permits, if required for installation.
3. Location of and communication of setback requirements for wetlands, water bodies, streams, wells and other nutrient-sensitive areas.
4. Installation guidance as needed.
5. Facilitate and implement required design modifications with client and original designer.
6. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
7. Certification that the application process and materials meets design and permit requirements.

STATEMENT OF WORK
Nutrient Management (590)
Pennsylvania

CHECKOUT

Deliverables

1. Records of implementation.
 - a. Extent of practice units applied, acres and location of application.
2. Guidance for record keeping (implementation records maintained by the producer or agent)
 - a. Records of crops produced, planting and harvest dates, yields, residue management.
 - b. Records of recurring soil tests, and other tests (e.g. manure, plant tissue, water) used to implement the plan.
 - c. Records of recommended nutrient application rates.
 - d. Records of nutrient applications including quantities, analyses, and sources of nutrients applied; dates and methods of application.
 - e. Records of recurring review of the plan including the dates or review, individual performing the review, and recommendations that resulted from the review.
3. Certification that the application meets NRCS standards and specifications.
4. Progress reporting.
